

Job Title: Software Engineer (Python)

Location: Auckland, New Zealand

Employment Type: Full-Time

Job Summary:

We are seeking a motivated Software Engineer with strong Python skills to design, develop, and maintain scalable software applications. The successful candidate will work closely with cross-functional teams to deliver high-quality solutions.

Key Responsibilities:

- Develop and maintain Python-based applications
- Design and implement RESTful APIs
- Write clean, maintainable, and testable code
- Collaborate with QA and DevOps teams
- Participate in code reviews and agile ceremonies

Required Skills:

- Strong proficiency in Python
- Experience with Object-Oriented Programming (OOP)
- Familiarity with SQL databases (SQLite, MySQL, or PostgreSQL)
- Understanding of REST APIs
- Experience with Git version control

Preferred Qualifications:

- Experience with Docker and containerization
- Knowledge of cloud platforms (AWS, Azure, or GCP)
- Familiarity with CI/CD pipelines

Education:

Bachelor's degree in Computer Science or related field (or equivalent experience)
